CanBalers

Single Phase Manual Mini Balers

The Alert MINI-Can-Balers are the smallest Can Balers ideally suited for small operations or places where only single phase power is available.

The MINI-Baler is an easy to operate machine:

- ▶ The operator disengages the door latch, opens the door and fills the vertical chamber. Next the operator closes the door and engages the door-latch and switches the power unit on.
- ▶ The machine has a manual Hydraulic Control Valve mounted on the side of the stand, controlling the Compaction Cylinder.
- ▶ A Pressure Gauge mounted adjacent to the controls indicates to the operator when maximum Compaction is reached.
- ▶ The cylinder is now manually retracted, the door released and opened, and the bale ejected by extending the cylinder to full stroke.

- ✓ FIRST IN QUALITY
- ✓ HIGH PRODUCTIVITY
- ✓ SMOOTH OPERATION
- ✓ FULL SERVICE SUPPORT
- ✓ TOMORROWS DESIGN

Alert Engineering Co Ltd have over 30 years experience in the design, manufacture and servicing of Transport Solutions. We manufacture & Supply a large range of Ferrous and Non-Ferrous Balers, Shears, Compactors, Scrap Metal Industry Related Equipment, etc. (The Sky is the Limit!) With In-house State of the Art Design, Development and Manufacture our expertise is second to none, and quality is controlled in an ISO9002 environment.
