

Alert Stationary Rear Hook Loader Compactors

15 m³

or

25 m³

Various Optional Tippers

Alert Rear Hook Loader Compactors are known for their reliability and performance. Their ideal environment is in medium to large shopping centres, goods processing / distribution centres and factories where vast volumes of waste requires compaction. The compaction of waste on-site allows for a smaller foot-print of the stored refuse, a cleaner safer workspace and a more managed control over rodents and pests.

The Compactors are transported using Rear Hook Loaders such as the Alert AHR Series, to empty direct at tip sites or alternatively at transfer stations. The Compaction and optional Tipper are powered by the onboard Electro-Hydraulic Power Unit, and all functions are controlled by an Alert programmed on-board PLC. The Power Supply (3 Phase) is connected from the supply (wall) to the receptacle on the compactor.

Additional Standard Safety Features include Key-Lock Operation (access is limited to authorised personell only) Hydraulic Compactor Chamber Lid, Automatic (electronic) Lock-outs and motor overload / heat protection. Recommended transport is a 16-20 Ton Lift / Transport Truck (depending on refuse processed). (see over for more details)

- ✓ FIRST IN QUALITY
- ✓ HIGH PRODUCTIVITY
- ✓ SMOOTH OPERATION
- ✓ FULL SERVICE SUPPORT
- ✓ TOMORROWS DESIGN

Alert Engineering Co Ltd have over 30 years experience in the design, manufacture and servicing of Transport Solutions. We Manufacture & Supply a large range of Ferrous and Non-Ferrous Balers, Shears, Refuse Compactors, Scrap Metal Industry Related Equipment, etc. (The Sky is the limit!) With In-house State of the Art Design, Development and Manufacture our expertise is second to none, and quality is controlled in an ISO9002 environment.

ALERT - Diversity in Engineering

Due to the Alert Engineering Co Ltd' continuous product improvements, specifications and dimensions may change without notice. Alert Engineering Co. Ltd shall not be held responsible for any errors in their catalogues, brochures or any other printed material.

Compactors

Alert Stationary Rear Hook Loader Compactors

Technical Information, Main Features & Options

TECHNICAL INFORMATION:

<i>Description</i>	<i>Capacity</i>	<i>Capacity</i>
	15 m ³	25m ³
Electric Motor	4 kW / 5.5 Hp 415V AC - 50Hz 3 Phase	
<i>Dimensions:</i>		
Overall Length	6010mm	6950mm
Lid Down Height	1833mm	2560mm
Lid Open Height	3180mm	3180mm
Overall Width	2420mm	2420mm
Tipper Lift Capacities	Various from appr. 200 kg ~ 500 kg Lift	
Required Power Supply	Cee Type 17 / IP65 / 16Amp Plug and Wall Mounted Isolator Switch	

Main Features:

- ✓ Excellent On-Site Compaction of General Refuse
- ✓ Transported using Rear Hook Loading Trucks
- ✓ 15 & 25m³ Nominal Bin Capacity
- ✓ Visual "Bin Full / Blockage" indicator on control panel
- ✓ Key Switch Operation prevents unauthorised access
- ✓ Hydraulically Operated Lid prevent access to compactor
- ✓ Seal on Discharge Door helps prevents contamination of drains
- ✓ MGB or Special Bin Tipper (optional)
- ✓ Optional Fluid Drain Connection(s)
- ✓ Another QUALITY Alert Product!
- ✓ Suited for Medium to large Sized Factories / manufacturing / Shopping Centres
