

# New Scrap Star Magnets

---

## Introducing the New 58 and 67 Inch Scrap Star Magnets.

*The Scrap Star Series magnets are engineered specifically to meet the requirements of scrap, foundry, and steel mill processing operations. Built with Magnetech's patented Electro-Core design.*

The Scrap Star series rugged all welded case design is of a cast steel construction, minimizing weight while maximizing lift-to-weight ratios without sacrificing strength and durability. The new Scrap Star case design is manufactured to withstand the conditions found in scrap yards and steel mills, incorporating a wear resistant layer of hard surfacing welded into the center and outer poles and includes a high impact resistant heavy-duty manganese bottom plate.

### **58" CDAE**

- 230vdc
- Cold Amps 68
- Weight 5,100 Lbs.
- #1HM 3,275 Lbs.
- #2 HM 2,225 Lbs.
- Turnings 1,075 Lbs.
- Punchings 4,000 Lbs.

### **67" CXDAE**

- 230vdc
- Cold Amps 112
- Weight 6,950 Lbs.
- #1HM 5,225 Lbs.
- #2 HM 3,500 Lbs.
- Turnings 1,700 Lbs.
- Punchings 6,475 Lbs.

*Our service technicians are available 24/7/365 at each of our Service Centers*
